

Alfen Eve Double PG-line DE

Charging safe and secure according to the latest Eichrecht conformity norms

The Alfen Eve Double PG-line DE meets the latest Eichrecht conformity norms, to offer a safe and secure charging experience. The charger is specifically designed for public locations with a robust housing and a high-quality finish for every application. A large and clear display provides the user with all needed information during the charging process such as charging speed. Complementary status indicators at both outlets ensure a user friendly experience.

Alfen Eve Double PG-line DE

Made for public charging in accordance with Eichrecht

The charging station

Two-sided build-up

The Alfen Eve Double PG-line DE is equipped with two doors. One door is accessible by the owner, the other door is accessible by the Grid Operator. The Grid Operator and owner have all space to install locally required components.

Ease of use

The 7" full-colour display and multiple LED status indicators make the Alfen Eve Double PG-line DE a user-friendly charge point.

Eichrecht

The Alfen Eve Double PG-line DE is specifically designed for semi-public and public locations and is fully Eichrecht conform. All users can easily verify their charging data.

Choose your own service provider

All Alfen chargers are SIM-lock free. This gives you the liberty of being able to choose the Service Provider and subscription you prefer.

Smart charging

With its entirely renewed software and hardware, the Alfen Eve Double PG-line DE supports various features such as OCPP 1.6, smart-charging and Load Balancing.

Easy configuration

Connect the Alfen Eve Double PG-line DE to a laptop during installation and enter your preferred configuration settings with our free configuration software
